

## Labcorp Launches MyLabcorp™, a New AI-Powered Mobile App Designed to Help Consumers Understand Lab Results and Track Health Trends Over Time

May 20, 2026

- *MyLabcorp connects lab results, educational content and AI-enabled features in a secure, personalized mobile experience*
- *Leverages OpenAI models designed to help users understand their results, ask questions and identify patterns over time*

BURLINGTON, N.C., May 20, 2026 /PRNewswire/ -- [Labcorp](#) (NYSE: LH), a global leader of innovative and comprehensive laboratory services, today announced the launch of [MyLabcorp™](#), an AI-powered mobile app that brings together lab results, AI-enabled features and clinical guideline-based content in a secure, personalized mobile experience. The app is designed to give users additional context about their health and support more informed conversations with healthcare providers.

### Meeting Demand for Clearer Health Information

As healthcare becomes increasingly consumer-driven, individuals are turning to AI tools to help interpret health information, from understanding lab results to determining next steps in care. According to a [Labcorp survey](#), more than half of consumers (55%) view AI as important for understanding healthcare information, with many already using it to interpret lab results (41%) and understand test ranges (35%). However, many AI tools answer questions in isolation without broader clinical context. MyLabcorp aims to address this gap by enabling users to view their Labcorp test results alongside relevant educational content and AI-generated explanations based on available data over time.

"Consumers are increasingly turning to AI to help them make sense of their health, but trust and clinical context matter," said Amy Summy, EVP and chief marketing officer at Labcorp. "By bringing together Labcorp's deep scientific expertise with AI, MyLabcorp is designed to help individuals move beyond isolated results to gain deeper insights into their health and support more informed conversations with their healthcare providers."

### A More Connected, Intuitive Way to Understand Health

Key features of MyLabcorp include:

- **Lab results over time** – Users have access to their Labcorp test results in a mobile-friendly view that tracks trends over time.
- **AI-enabled insights** – Users can chat with an AI assistant for real-time, personalized explanations of lab results and lifestyle considerations based on available Labcorp test data. MyLabcorp's AI capabilities are powered in part by OpenAI's advanced reasoning models, enabling more natural, conversational interactions tailored to each user.
- **Health education content** – Users can explore clinically reviewed, guideline-based information across key health areas, including cardiometabolic health, mental health, digestion, kidney function and sexual health, integrated with lab results to show trends and provide additional context.
- **Lab services and support** – Users can view and schedule appointments, locate patient service centers, access results, shop for tests and manage billing.
- **Secure, trusted experience** – A HIPAA-compliant platform built to protect personal health information and user data.

"At Labcorp, we're investing in advanced technology and AI to make diagnostic insights more accessible, personalized and actionable, improving how people understand and manage their health," said Bola Oyegunwa, Ph.D., EVP and chief information and technology officer at Labcorp. "MyLabcorp reflects this approach by combining Labcorp's scientific expertise with OpenAI's models to help individuals better understand their results and identify patterns over time, all within a secure, trusted environment."

### Availability of MyLabcorp<sup>1</sup>

MyLabcorp is now available in the [Apple App Store](#) and [Google Play Store](#) with additional features rolling out on an ongoing basis.
