BURLINGTON, N.C., October 24, 2024 – Labcorp (NYSE: LH), a global leader of innovative and comprehensive laboratory services, today announced results for the third quarter ended September 30, 2024 and updated full-year guidance.

“Labcorp achieved strong performance in Diagnostics and Biopharma Laboratories, including robust organic growth in the third quarter,” said Adam Schechter, chairman and CEO of Labcorp. “Our results demonstrate momentum in our core businesses as we introduced new tests, and extended our leadership position in specialty testing. We announced or completed several transactions with health systems and regional/local laboratories, which aligns with our acquisition strategy. We are on track to finish 2024 with strong growth as we focus on science, technology, and innovation and bring new tests and services to our customers.”

The company continues to make strides in science, technology, and innovation:

Use of Adjusted Measures

The company has provided in this press release and accompanying tables “adjusted” financial information that has not been prepared in accordance with GAAP, including adjusted net income, adjusted EPS (or adjusted net income per share), adjusted operating income, adjusted operating margin, free cash flow, and certain segment information. The company believes these adjusted measures are useful to investors as a supplement to, but not as a substitute for, GAAP measures, in evaluating the company’s operational performance. The company further believes that the use of these non-GAAP financial measures provides an additional tool for investors in evaluating operating results and trends, and growth and shareholder returns, as well as in comparing the company’s financial results with the financial results of other companies. However, the company notes that these adjusted measures may be different from and not directly comparable to the measures presented by other companies. Reconciliations of these non-GAAP measures to the most comparable GAAP measures and an identification of the components that comprise “special items” used for certain adjusted financial information are included in the tables accompanying this press release.
